PROFILE

Dynamic Software Developer with one years of experience in full-stack development, proficient in both front-end and back-end technologies. Demonstrated expertise in web development and database management, complemented by a strong ability to collaborate within teams. Eager to leverage technical skills and project experience to contribute to innovative solutions in a well-structured corporate environment. Committed to continuous learning and development, ready to tackle exciting challenges in the field of software development.

WORK EXPERIENCE

Insight Innova

Jan, 2024 - Present

Software Developer

Currently, I am engaged in hands-on software development projects, utilizing **React, Node.js, & MongoDB** to deliver effective solutions. One of my key projects is a comprehensive school management system. This product includes:

- Admin Panel: A centralized interface for managing all school operations.
- Web Application: A responsive platform that provides resources and updates to students and staff.
- Online Question Maker: A feature that simplifies the creation of question papers by providing an online alternative to traditional methods.

This entrepreneurial experience has allowed me to refine my technical skills while managing end-to-end product development, ensuring quality and functionality.

Skaplink Technologies Pvt Ltd.

Oct, 2021 - Dec, 2023

Software Developer

I began my career as an intern, where I gained hands-on experience in building user-facing website components and managing back-end data systems. Over time, I have developed strong skills in front-end development and database management. I am now eager to contribute my expertise to a well-structured organization where I can continue to grow professionally and work on impactful projects.

Highlighted Projects:

- GMCHRMS:** Contributed to the development of a Human Resource Management System for a government organization as part of a team. This project enhanced my understanding of programming, including understanding how to structure HR operations like employee onboarding, attendance tracking, and performance evaluation.
- Storeflex:** Created a robust online platform for warehouse management, enabling seamless inventory control, order processing, and logistics coordination. This project aimed to optimize warehouse operations and elevate customer satisfaction through efficient digital solutions.
